25X1

1. As of early September 1955, there was a deficit of 9.3 million brass sockets in the East German incandescent lamp enterprises. This deficit was caused by the failure of VEB Walzwerk fuer Buntmetalle in Hettstedt to deliver the necessary amount of brass sheet to the only East German firm making brass sockets, VEB Glueso Werk in Tambach-Dietharz. About 90 percent of the lacking 9.3 million brass sockets were for direct or indirect export, i.e. either for the export of bulbs or export of equipment provided with brass socket bulbs. Ten percent were needed in East Germany for special lamps such as safety lamps and signal lamps.

the East German incandescent lamp

enterprises (mainly VEB Berliner Gluehlampenwerk and VEB Gluehlampenwerk  
Potsdam) would not be able to produce incandescent lamps with brass sockets if  
imported brass sockets were not received before the end of September 1955.

however, the enterprises mentioned would be able to make bulbs from them. On the same occasion, the Ministry for General Machine Construction pointed out that failure to import the offered 4.5 million brass sockets would result in a loss of 62.4 million RMB in direct and indirect exports.
